

Variable Message Sign - VMS

Standard Amber & Colour Board

Equipment Description

TQ - VMS Boards can be used for a broad range of applications. They are trailer-mounted self-powered units via solar panels enabled with battery back-up. All units have inbuilt satellite GPS tracking. Built to AS 4852.2-2009 Australian Standards & RMS Technical Specifications No. P3104A.

Ideal for Road Safety Messages, Real-Time Traffic Information, Speed Advisory Signs (use of radar), Sales & Promotional Campaigns, Events & Festivals. Multiple programming ability via PC, SMS, Internet & Keyboard. Fully solar powered & environmentally friendly. VMS Board accessories include a camera for live streaming and a radar detection and blue track monitoring device.

Our The 'C' Size display both amber & retro colour, any range of messages composed of letters, symbols and animations in 5 different high visibility colours. It's a must for efficient local traffic management, roadwork safety and is a very effective advertising tool.
